

CLEAN ENERGY BOOM SOARS PAST 300,000 JOBS

**312,900 NEW CLEAN ENERGY JOBS
NOW AT RISK FROM TRUMP AND BIG OIL'S REPEAL CRUSADE**

UPDATED: JUNE 20, 2024

Since President Joe Biden's landmark climate and clean energy investments became law in August 2022, companies have taken bold steps forward to build our clean energy future. New manufacturing in wind, solar, batteries, electric vehicles (EVs), and energy storage projects across the country means new, good-paying jobs. Since August 2022, companies have announced or moved forward with projects accounting for **more than 312,900 new clean energy jobs** for electricians, mechanics, construction workers, technicians, support staff, and many others.

As the largest U.S. investment in climate and clean energy in history, President Joe Biden's Made in America clean energy boom is just getting started. Spanning from Georgia to Michigan to Arizona, these jobs are creating cleaner, cheaper energy choices for all of us – but former president Trump's \$1 billion "deal" with oil executives threatens to gut this progress. Trump has pledged to repeal the clean energy plan and crush these clean energy industries starting on "Day 1." House Republicans have already passed legislation to repeal President Biden's clean energy plan, despite major clean energy manufacturing investments in many of their districts.

This brief analyzes public announcements from the private sector since the passage of the clean energy plan to demonstrate the breadth and scale of the growing clean energy economy being built across the country. It also provides a breakdown of the data by state, sector, and congressional district, as well as projects, jobs, and investments in rural and low-income communities across America and in districts represented by Republican members of the House of Representatives.

MORE THAN 312,900 NEW JOBS ACROSS THE COUNTRY

Companies announced and advanced **585** new clean energy projects totaling **312,900** new jobs and over **\$361 billion** in investments across **47** states and Puerto Rico between August 16, 2022, and May 31, 2024

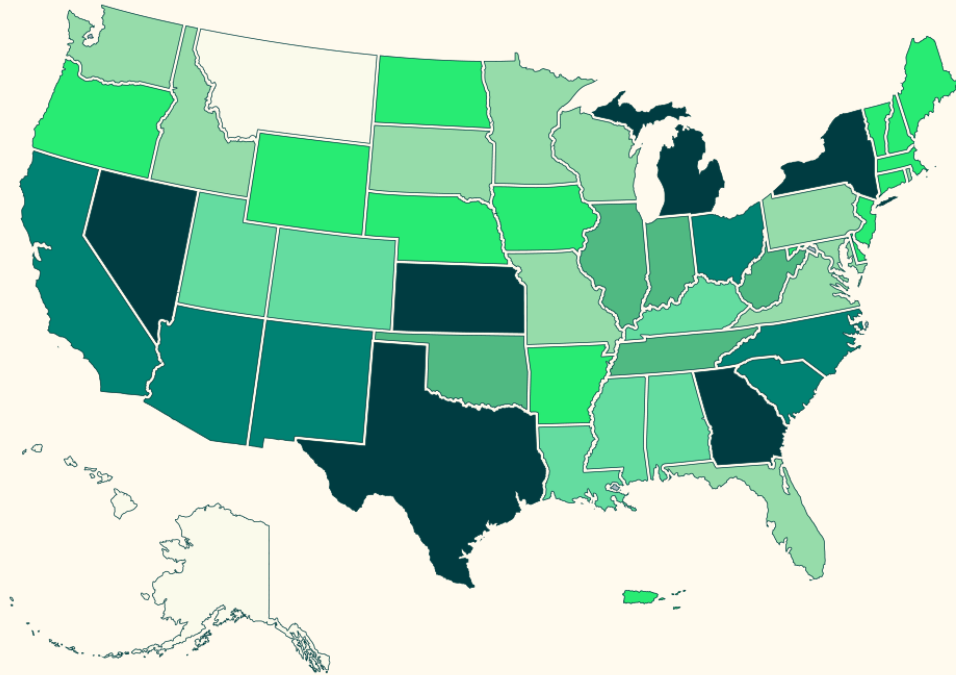

Plans include **173** new battery manufacturing sites, **137** new or expanded electric vehicle manufacturing facilities, and **166** solar and wind manufacturing plants. The majority of projects are in five states —Michigan, Texas, Georgia, California, and South Carolina.

A bulk of the new clean energy projects are located in congressional districts represented by Republican members of the House of Representatives – totaling **181,996** new jobs and over **\$282.05 billion** in investment across **321** clean energy projects in **146** Republican-held districts.

In low-income communities, **267** new clean energy projects have been announced since the passage of the clean energy plan, bringing **\$111 billion** in investment and **127,910** jobs to low-income communities across **37** states.

Across rural America, **108** new clean energy projects have been announced since the passage of the clean energy plan, bringing **\$51.69 billion** in investment and **51,354** jobs to rural communities across **33** states.

CLEAN ENERGY JOBS PER STATE UNDER THE CLEAN ENERGY PLAN

JOB PER STATE:	1-1,000	1,000-2,500	2,500-5,000	5,000-10,000	10,000-20,000	20,000+
----------------	---------	-------------	-------------	--------------	---------------	---------

The jobs being created across the country are good-paying opportunities for electricians, mechanics, construction workers, technicians, support staff, and thousands of others. Clean energy jobs [pay higher wages](#) and provide good benefits; research from the [Brookings Institution](#) finds that landing a clean energy job can result in an eight to 19 percent income increase. [75% of the new jobs](#) the clean energy plan will create don't require four-year degrees, meaning they're accessible to all Americans.

The transition to a clean energy economy is also benefiting union workers. The clean energy plan includes strong labor provisions and incentives to ensure these new clean energy jobs lead to careers that will truly sustain workers and their families. In November 2023, the [United Auto Workers ratified a new agreement](#) with Ford, Stellantis, and General Motors that guaranteed future EVs would be made in America with union labor. The new agreement also allows [workers at new and planned EV battery manufacturing plants](#) to join the UAW's master agreement, ensuring workers across the EV supply chain receive good pay and benefits. Unions outside of the auto industry are also benefiting from the clean energy plan. In

December 2023, the International Brotherhood of Electrical Workers (IBEW) signed a project labor agreement to build the SunZia transmission line across Arizona and New Mexico, an opportunity that IBEW President Kenneth Cooper said would “[create good, middle-class jobs throughout the region.](#)” The project labor agreement follows an October 2023 [national tri-trade solar agreement](#) between the IBEW, the Laborers International Union of North America, and the International Union of Operating Engineers, which makes it easier for developers, contractors, and unions to bring more solar power online.

THE CLEAN ENERGY ECONOMIC BOOM BY SECTOR

JOBS BY SECTOR			
SECTOR	# OF PROJECTS	NEW JOBS	NEW INVESTMENTS
BATTERIES	173	130,326 JOBS	\$120.78 BILLION
CLEAN TECHNOLOGY	56	44,515 JOBS	\$147.98 BILLION
ELECTRIC VEHICLES	137	45,878 JOBS	\$27.63 BILLION
GRID & TRANSMISSION	28	11,779 JOBS	\$9.22 BILLION
HYDROGEN	25	10,868 JOBS	\$14.10 BILLION
SOLAR	120	57,053 JOBS	\$33.28 BILLION
WIND	46	12,481 JOBS	\$9.59 BILLION

312,900 NEW CLEAN ENERGY JOBS

UNDER PRESIDENT BIDEN'S CLEAN ENERGY PLAN

DATA: CLIMATE POWER

THE CLEAN ENERGY ECONOMIC BOOM IN THE STATES

States across the country have already benefited from the provisions of the national clean energy plan. Even [climate skeptics have touted the benefits of the law](#) and have celebrated clean energy project announcements in their districts because they now realize that the clean energy plan means big investments and new jobs in their communities. Since August 2022, the clean energy plan has significantly benefited local economies and will provide family-sustaining wages in ZIP codes from coast to coast.

10 STATES WITH MAJORITY OF NEW JOBS			
STATE	# OF PROJECTS	NEW JOBS	NEW INVESTMENTS
GEORGIA	41	30,661 JOBS	\$23.88 BILLION
NEW YORK	23	28,934 JOBS	\$115.45 BILLION
TEXAS	46	23,146 JOBS	\$16.45 BILLION
MICHIGAN	58	21,490 JOBS	\$25.38 BILLION
KANSAS	5	21,077 JOBS	\$4.24 BILLION
NEVADA	16	20,098 JOBS	\$14.50 BILLION
SOUTH CAROLINA	31	17,865 JOBS	\$15.01 BILLION
NEW MEXICO	7	16,625 JOBS	\$2.99 BILLION
ARIZONA	20	15,570 JOBS	\$11.24 BILLION
OHIO	27	13,669 JOBS	\$10.43 BILLION
NORTH CAROLINA	26	12,090 JOBS	\$19.18 BILLION

METHODOLOGY

This report analyzes public announcements from the private sector since the passage of the Inflation Reduction Act (clean energy plan) to demonstrate the breadth and scale of the clean energy economic boom happening all across the country. It tracks public announcements from the private sector between August 16, 2022, and May 31, 2024. The full list of included projects [can be found here](#).

In this report, “low-income communities” are defined as counties or Census-designated places where the median household income is less than 200% of the federal poverty line. This analysis is based on publicly available income data (“Income in the past 12 months (in 2020 inflation-adjusted dollars)”) [downloaded](#) on December 14, 2023, and the [2020 federal poverty threshold](#) for a four-person household.

In this report, “rural communities” are defined as counties in which at least 50% of the population is located in a “rural” area, according to the 2020 Census. This analysis is based on publicly available data (“County-level 2020 Census Urban and Rural Information for the U.S., Puerto Rico, and Island Areas sorted by state and county FIPS codes,”) [downloaded](#) on September 11, 2023. The 2020 Census

defines rural as all populations “not included in an urban area,” and defines urban areas as those with at least 2,000 housing units or a population of at least 5,000.
