

# NEW JERSEY

NEW JERSEY WAS BECOMING A CLEAN ENERGY POWERHOUSE, BUT TRUMP’S ACTIONS ARE REVERSING THAT PROGRESS - NOW CLEAN ENERGY REPEAL EFFORTS ARE RISKING CATASTROPHE

Since new clean energy investments were passed in 2022, America’s clean energy sector has kicked into high gear, solidifying New Jersey as a clean energy hub. But in just the first few months since Trump’s election, attacks on clean energy and the uncertainty of tariffs have already taken their toll, leading to the cancellation, delay, or threatening of **\$2.69 billion** in investments and **7,700 jobs** across clean energy sectors in New Jersey alone.

Now, efforts from some Washington Republicans to repeal tax credits for clean energy manufacturing could completely decimate the manufacturing boom New Jersey and many other states have seen since 2022. If those Republicans in Congress succeed, **\$1.79 billion** in investment and **230** good-paying clean energy jobs are at risk of being killed in New Jersey alone. The **three** new clean energy projects that represent these investments and jobs span three sectors, including batteries, grid and transmission, and wind.

## UNPLUGGED: TRUMP IS KILLING NEW JERSEY’S CLEAN ENERGY MOMENTUM

Since taking office, the Trump administration’s tariffs and attacks on federal clean energy investments have caused companies to cancel, delay, and threaten billions in clean energy investments statewide, jeopardizing 7,700 jobs.

CLEAN ENERGY PROJECTS IN NEW JERSEY LOST OR THREATENED SINCE TRUMP TOOK OFFICE				
<b>\$2.69 B</b> INVESTMENTS LOST OR THREATENED IN CLEAN ENERGY PROJECTS			<b>7,700</b> JOBS LOST OR THREATENED IN NEW JERSEY

## SPOTLIGHT: NEW JERSEY'S CLEAN ENERGY PROJECTS

Since the passage of the clean energy investments in 2022, companies have announced more clean energy projects in New Jersey, creating 230 jobs. Those investments and jobs are now at risk as some Washington Republicans advocate for a repeal of the tax credits that these businesses counted on when they invested in the state.

- Wind energy is taking off in New Jersey, with the New Jersey Board of Public Utilities [selecting the Larrabee Tri-Collector Solution](#) to connect offshore wind to the state's electricity grid.

## SPOTLIGHT: CLEAN ENERGY JOBS ALREADY LOST OR AT RISK IN GOP DISTRICTS

---

The clean energy investments of 2022 spurred significant investment and job creation in North Jersey districts represented by Republican members of the House. These jobs and investments are now at risk:

- **New Jersey's 2nd Congressional District:** Rep. Jefferson Van Drew represents New Jersey's 2nd Congressional District, where three new clean energy projects have been canceled or paused due to the Trump administration's tariffs and attacks on federal clean energy investments. These three clean energy projects were expected to bring \$1.98 billion in investment and 7,700 jobs to the district.
- **New Jersey's 4th Congressional District:** Rep. Christopher Smith represents New Jersey's 4th Congressional District, where one new clean energy project is expected to invest \$1.07 billion.
- **New Jersey's 7th Congressional District:** Rep. Thomas Kean represents New Jersey's 7th Congressional District. This year, Rep. Kean joined 20 other House Republicans in a letter urging House Leaders to protect the clean energy investments because of the jobs and projects they were driving to their states.
