

ACCOUNTABILITY

We are up against powerful forces in the climate fight, and you can help us show who they are. For decades, oil & gas CEOs and their political allies have denied the facts and delayed the climate fight — all to keep their profits rolling in. We need Americans to know how climate deniers are making life harder for our families.

Here's what we need to show:

- **Attacks on clean energy will raise our power bills and kill jobs — all to make oil and gas CEOs richer.**
 - The Trump administration's attacks on cheap, homegrown clean energy could eliminate competition against fossil fuels. While their CEOs make more money, we all could pay higher prices, and lose good manufacturing jobs.
- **Attacks on clean air and water protections put kids in harm's way — all so CEOs can profit.**
 - Our kids deserve breathable air and drinkable water, and our leaders should fight to protect them.
 - The Trump administration's attacks on air and water protections are putting our kids in harm's way while corporate polluters boost their profits.
- **Corporate polluters are rigging the system so they can keep getting rich while we pay the price.**
 - Corporate polluters spend millions to support candidates who will follow their agenda — to make their CEOs richer. Meanwhile, our families pay higher prices, face more health risks, and face more danger from extreme weather.
