

President Joseph R. Biden
The White House
1600 Pennsylvania Ave. NW
Washington, DC 20500

The Honorable Kevin McCarthy
Speaker of the House
U.S. House of Representatives
H-232, The Capitol
Washington, DC 20510

The Honorable Charles E. Schumer
U.S. Senate Majority Leader
S-221, The Capitol
Washington, DC 20510

The Honorable Hakeem Jeffries
House Democratic Leader
U.S. House of Representatives
H-204, The Capitol
Washington, DC 20510

The Honorable Mitch McConnell
U.S. Senate Republican Leader
S-230, The Capitol
Washington, DC 20510

Dear President Biden, Speaker McCarthy, House Democratic Leader Jeffries, Senate Majority Leader Schumer, and Senate Republican Leader McConnell:

As executives with American clean energy companies, we employ thousands of Americans in a fast-growing industry. The Limit, Save, Grow Act (H.R. 2811) threatens both our individual businesses and larger efforts to onshore our energy supply chain, supercharge innovation, and make our nation more energy independent than it's ever been.

Since the Inflation Reduction Act became law, our industry has publicly announced more than 140,000 new clean energy jobs in communities across the country. Thousands more additional jobs will be created as our investments flow throughout the economy, building factories and clean energy infrastructure.

It makes no sense to us that H.R. 2811 jeopardizes our nation's economy with a catastrophic default unless these jobs are eliminated. America's allies and rival nations alike are not threatening to wipe out their industries; instead, they are trying to outcompete us. The truth is that threats to our businesses aid foreign competitors against us in the innovation race to lead the world in the next generation of energy production.

We became executives in the growing field of clean energy production by looking forward and planning for the future. Americans overwhelmingly support the clean energy tax credits passed in the Inflation Reduction Act; the law is creating jobs, lowering costs, encouraging domestic production, and building energy security. Our nation's clean energy boom is just getting started.

H.R. 2811 would set our companies back and do terrible harm to American energy innovation and security.

We urge you to reject efforts to repeal the Inflation Reduction Act and end the threats to our businesses and hundreds of thousands of American clean energy jobs.

Thank you,
