THE INFLATION REDUCTION ACT IS TURBOCHARGING WISCONSIN'S ECONOMY, POSITIONING IT AS A SOLAR & EV MANUFACTURING HUB

Passing the Inflation Reduction Act (IRA) has kicked America's clean energy sector into high gear and in Wisconsin, that means the state's clean energy economy is growing. Across the state, new clean energy projects have already spurred \$445 million in investment and created or moved forward over 500 good-paying clean energy jobs. Wisconsin ranks 9th in the nation for new solar energy investments, with three projects creating \$345 million in investment in the state. The IRA will continue to accelerate the clean energy jobs boom while lowering energy costs for families, investing in disadvantaged communities, and reducing climate pollution across the state.

## SNAPSHOT: WISCONSIN'S CLEAN ENERGY ECONOMY

---

Since the passage of the IRA, clean energy projects in Wisconsin moved forward creating jobs and investing in the state's clean energy economy:

- ABB announced a **\$100 million investment** to build electric drive units for EVs in New Berlin, creating 100 new jobs. In making the announcement, **the company cited** increased confidence in the U.S. market driven by the IRA. In May 2023, Ingeteam also announced it would add **100 new jobs** to its Milwaukee EV charger manufacturing facility.
- Wisconsin utilities are increasing their battery storage investments following the IRA. In September 2022, Alliant Energy shared plans to add utility-scale battery storage systems to its solar energy farms in Wood and Grant Counties. A spokesperson for **the company said** it accelerated plans for battery storage following the passage of the IRA.
- The federal government's "**focus on renewables**" drove Excellerate's decision to build a new electrical component manufacturing facility in Little Chute, according to the company's Executive VP. The facility will create 200 new jobs.

Overall, Wisconsin's clean energy economy is booming with more than 70,000 jobs across the state as of 2022, including jobs in renewable electricity generation, energy storage, energy efficiency, and clean vehicles. As the largest U.S. investment in clean energy and climate in history, the IRA will continue to reshape and recharge our economy for many decades to come. The Made in America clean energy boom is just getting started.
